

SGD80/SGDP80

Integrated/standalone 8" video screen
Bright and dynamic

SAGA 

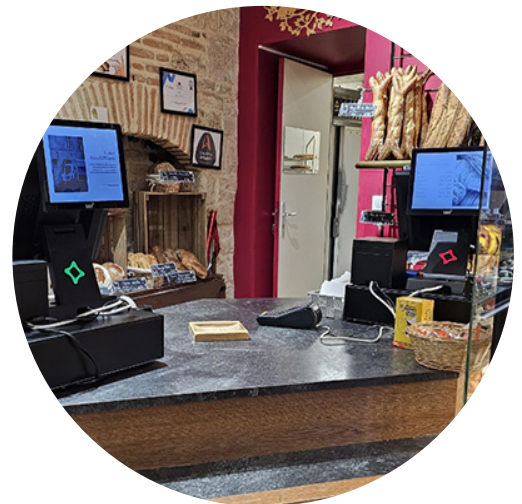

HIGH RESOLUTION 8" LCD SCREEN

The SAGA range can adapt to new environments when it comes to digitising points of sale, with its 8" screen: SGD80II model integrated at the back of the OVA II POS or SGDP80 separate at the checkout point.

This LED LCD screen with a luminance of nearly 300 cd/m² is an essential marketing asset for point-of-sale promotional management (special operations, video presentation of the service/product concerned, price/discount communication, etc.) It comes with a simple, easy-to-install USB connection.

With a 1024x768 resolution, the SAGA advertisement screen has a tilt angle of up to 60° and a splash and residual dust resistant rimless screen head.
